 USB Flash Drive	Installs internally <i>(and externally in some printers**)</i> Power printer off to insert or remove. Card can be reprogrammed.	Internal is somewhat removable. External is easily removable**.	HP LaserJet P3005, M3027, M3035, **P4014, **P4015, **P4515, **P3015 **These printers have one externally accessible port in addition to two internal ports for Standard USB Flash Drives.
 FutureSmart USB	Installs externally and internally. Power printer off to insert or remove. Card can be reprogrammed.	External is easily removable. Internal is somewhat removable.	HP LaserJet M601, M602, M603, M604, M605, M606, M607, M608, M609, M806, M830 These printers have external and internal ports for FutureSmart USB Flash Drives.
 Secure Font System³	Base Unit connects to printer's parallel port. Printer may be on-line when inserting or removing Secure Card. Power printer off to connect or remove Base Unit. Card can be reprogrammed.	Easily removable Flash Memory Secure Card.	Printer-independent technology works with all parallel interface HP LaserJet models . The SFS works with many non-HP PCL-compatible Lasers with a parallel port, including Lexmark, IBM & Xerox. Printer must have parallel port.

Usage

Font devices are installed in or connected to laser printers to print fonts, signatures and logos on checks or other documents using software that permits you to enter PCL printer escape codes.

Signature

Follow the instructions on the attached Signature Template to provide signature samples and order information for your custom signature font device.

Custom Font Product Price List

Qty.	Part#	Description	Price
Internal Font Devices

Signature TEMPLATE

Original signatures will be scanned to create an electronic image to be positioned on your checks.

Follow these submission guidelines:

- Submit three signature samples in **black ink** using a non-skipping ball-point, roller-ball or fountain pen. You may indicate your preference, but we may need to use a different signature for technical reasons.
- Additional Signature Templates are available from microMICR or for download at our web page: <http://www.micro-micr.com/pdf-forms/SignatureTemplate.pdf>
- Try to keep the entire signature within the box.
- Write your signature in the **exact size** you wish it to print – we will resize the signature only if requested.
- If there are two signers, the first should sign in the **A** boxes and the second should sign in the **B** boxes. Use additional templates if there are more than 2 signers.
- **We must have the original ink signatures.** Photocopies or faxed copies are not acceptable.

Reusing a Signature

Use this form for re-orders only

microMICR maintains a file archive of signatures and images used over the years for custom font devices. Frequently companies will request new font devices reusing signatures from our file. This often occurs when a new location is added or a new printer model is put in service that is not compatible with the existing font device. It is generally more convenient for a company to reuse the exact same signature so they won't need to reformat their checks or file new facsimile signature cards with their banks.

In order to assure that we match the correct signature and to prevent any possibly fraudulent misuse of signatures, microMICR requires that all signature orders using images from our archive be accompanied by a laser printed copy of the original signature and an authorization signed by the signatory.

The following are acceptable for copies of the original signature:

- A copy of the Signature Template submitted in the original order
- A copy of the Test Page that was sent with the original font device
- A PCL Font List from a laser printer that shows the signature
- A check (voided) or other document that shows the signature laser printed by the font device
- The actual font device itself so microMICR can print a sample signature (it will be returned)

Authorization to Reuse Signature

I, _____, authorize microMICR Corporation to reuse my signature, an example of which is attached, in order to make a new custom font device for _____ (company).

Signed _____ Date _____

Note: Orders for a new font device that exclusively reuse signatures, logos and fonts from prior orders can be expedited by scanning and emailing the order form pages to microMICR@gmail.com.
