Signature TEMPLATE

Original signatures will be scanned to create an electronic image to be positioned on your checks.

Follow these submission guidelines:

- Submit three signature samples in **black ink** using a non-skipping ball-point, roller-ball or fountain pen. You may indicate your preference, but we may need to use a different signature for technical reasons.
- Additional Signature Templates are available from microMICR or for download at our web page:
<http://www.micro-micr.com/pdf-forms/SignatureTemplate.pdf>
- Try to keep the entire signature within the box.
- Write your signature in the **exact size** you wish it to print . we will resize the signature only if requested.
- If there are two signers, the first should sign in the %A+boxes and the second should sign in the %B+boxes. Use additional templates if there are more than 2 signers.
- **We must have the original ink signatures.** Photocopies or faxed copies are not acceptable.
